

MSC & WNI (WEATHERNEWS INCORPORATED). BEGINNING OF THE COOPERATION

After several months of running tests, on September the 23rd Captain Pasquale Ferraro (MSC Geneva Ops) and Mr Antonio Brizzo (Director of WNI, Italy) were in Barcelona to install for the first time the “Bridge Programme” on board the vessels **MSC Maeva and MSC Edna**. This is the start for both companies of a very strong collaboration where WNI will provide our fleet with the most accurate and reliable weather forecasts and MSC will provide WNI with its long history of nautical and vessel handling knowledge. It is anticipated that “BRIDGE” will be installed on all MSC’s vessels early in 2008.
